Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Tuesday 05 Sep 2023 until 23:59 on Wednesday 06 Sep 2023

Forecast Issued on Monday 04 Sep 2023 at 15:03

Confidence: Very high confidence for settled and very warm conditions continuing for the majority of this week and into the weekend. Much lower for the timings of a breakdown to more changeable conditions later in the weekend or early next week. Moderate for details of morning mist, fog and low cloud and low for any showers midweek.

Headline for Tuesday 05 Sep 2023: Another very warm day and feeling hot in the sunshine but also rather windy.

Mountain weather hazards on Tuesday 05 Sep 2023

Forecast for Tuesday 05 Sep 2023

Weather: Dry and sunny with mostly blue skies from dawn until dusk, although some high cloud is possible at times. Feeling very warm and fairly hot for a time through the middle of the day in shelter from the brisk easterly winds.

Chance of cloud-free hill tops above 600m: 100%.

Low cloud and visibility: Any cloud is expected to remain above all summits throughout. Generally very good visibility but distant hills and landmarks will appear hazy.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gusty winds through the morning in particular with local gusts of over 40 mph, not just over the summits, but also to some lower levels. High levels of UV are likely through the midday hours, so remember to protect your skin. Remember to also stay hydrated with low humidity expected.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Wednesday 06 Sep 2023

Weather: Any early low cloud or fog will soon clear to leave another largely fine day with periods of sunshine, but a chance of showers spreading up from the south by the evening. Much lighter winds than on Tuesday.

Maximum wind: Southerly 5-10 mph.

Chance of cloud-free hill tops above 600m: 80% becoming 95% or more.

Low cloud and visibility: Patchy dense fog in valleys first thing will give some locally very poor visibility until mid-morning. Thereafter generally very good visibilities but perhaps locally moderate in any evening showers.

Temperature: **Valleys:** Plus 14 Celsius rising to plus 29 Celsius.
At 600m: Plus 17 Celsius rising to plus 23 Celsius.
Freezing level: Well above the summits.
